

FAISAL ALANAZI

Software Developer

✉ faisal.alanazi.aa@gmail.com ☎ 0536526477 📍 Riyadh 🔗 Faisal Alanazi 🔄 FaisalAlanazi-1

Summary

Senior Information Systems student exploring software development through hands-on projects and continuous learning. Focused on improving problem-solving, following coding best practices, and understanding how real systems are designed and built.

Education

Bachelor of Information Systems, Imam Muhammad ibn Saud Islamic University 2024 – Present
GPA: 4.58 of 5

Professional Experience

Product Design Trainee, SANI | صانع — Masar Program 06/2026 – 07/2026
Riyadh

- Completed the first stage of the Product Design track within the Masar Program.
- Learned user journey design and digital product experience fundamentals.
- Built interactive interfaces and prototypes through hands-on projects.
- Explored the use of AI tools in the product design process.

Skills

Languages & Frameworks

- Flutter
- Dart
- Java

Databases & Backend

- Sql
- Supabase

API & Integration

REST APIs, Postman, JSON

Version Control & Collaboration

Git, GitHub

Projects

INDIVERSE 📄, Indie Games & Developers Platform 09/2026 – 09/2026
Developed a Flutter platform for discovering and supporting Saudi indie games. • Built personalized game discovery based on player genre preferences, including For You and Upcoming Games sections. Implemented developer features for managing games, events, playtesting interest, and creator outreach campaigns. • Integrated Supabase for authentication, database management, user preferences, events, and player requests. • Designed the platform to connect indie game developers with players and content creators in a unified ecosystem.

Palyzone 📄, Flutter Game Discovery App 08/2026 – 09/2026
Developed a Flutter mobile app for discovering free-to-play games using the FreeToGame REST API. • Implemented genre and platform filtering, game details, and a personal wishlist. • Handled asynchronous API data with FutureBuilder, including loading, error, and empty states. • Built a structured Flutter architecture with reusable models, screens, services, and centralized styling.

Saudi Explorer  , <i>Flutter Tourism Application</i> Developed a Flutter mobile application for discovering tourist destinations and landmarks across Saudi Arabia. Built interactive destination browsing, category filtering, favorites, onboarding, and detailed place pages using reusable widgets and structured data models. Achieved 2nd place among first-week projects in the Tuwaiq Flutter Bootcamp.	08/2026 – 09/2026
Todo Task  , <i>Flutter Task Management App</i> Developed a task management application using Flutter and Dart. - Implemented task creation, completion tracking, and deletion functionality. - Used Provider for state management to manage and update tasks across the application. - Built reusable UI components with a clear separation between application state and interface logic.	09/2026 – 09/2026
E-Learning Mobile Application  , <i>Flutter Learning Platform</i> - Developed a Flutter learning application with search, filtering, form validation, wishlist, and course enrollment features. - Built reusable UI components for course browsing, details, and user interactions. - Used Provider for state management and organized the application into maintainable components.	02/2026 – 02/2026
Travel – Destination & Activity App  , <i>Flutter Travel Application</i> - Developed a Flutter travel app for exploring destinations, trips, and activities. - Implemented category browsing, seasonal and family filters, trip details, and favorites. - Built dynamic and reusable UI components for an organized browsing experience.	01/2026 – 01/2026
Salla E-Commerce Platform , <i>Systems Analysis & Design</i> - Analyzed an e-commerce platform using system analysis and design concepts. - Modeled business processes, system requirements, and workflows. - Created UML diagrams including use case, class, sequence, and activity diagrams. - Documented the system analysis and design in a comprehensive project report.	02/2025 – 05/2025
Adel Legal Platform , <i>Requirements Engineering & System Modeling</i> - Analyzed a Saudi legal technology platform as an academic requirements engineering project. - Identified and documented functional and non-functional requirements. - Applied requirements analysis and system modeling techniques. - Produced a structured project report documenting requirements and system specifications.	11/2024 – 2025

Courses

Web Development Fundamentals  , <i>Microsoft via Coursera</i> Completed an online course covering the fundamentals of web development, authorized by Microsoft and offered through Coursera.	05/2026 Online
Core Project Management Process  , <i>University of Maryland via Coursera</i> Completed an online course covering core project management processes, authorized by the University of Maryland, College Park and offered through Coursera.	03/2026 Online
Designing User Interfaces and Experiences (UI/UX)  , <i>IBM via Coursera</i> Completed an online course in user interface and user experience (UI/UX) design, authorized by IBM and offered through Coursera.	03/2026 Online
