SUMMARY

Senior Computer Science student at Imam Mohammad Ibn Saud Islamic University with a strong interest in Artificial Intelligence, Software Engineering, and Full-Stack Web Development. Experienced in building AI-powered, web, and mobile applications using modern technologies, with hands-on experience in Java, Python, Flutter, SwiftUI, Kotlin Multiplatform, SQL, Next.js, UI/UX design, REST APIs, and API integration. Passionate about solving real-world problems, continuously developing technical skills, and building innovative and user-focused software solutions.

EDUCATION

Bachelor of Computer Science

Imam Mohammed Ibn Saud Islamic University

08/2023

Riyadh, Saudi Arabia

SKILLS

Programming

Java, Python, Kotlin, Swift, SQL, Flutter, Dart

Tools & Concepts

Git, GitHub, REST APIs, API Integration, Prompt Engineering, Teamwork, Problem Solving

EXPERIENCE

iOS Mobile App Development Bootcamp | Elm Company

- Completed an intensive bootcamp focused on cross-platform mobile application development using SwiftUI and Kotlin Multiplatform.
- Collaborated with a team to develop the **Mazadat Auction** mobile application.
- Project selected among the **Top 5 projects** in the bootcamp.

Design Team Member | Tawasul Club

- Designed digital assets and promotional materials for university events.
- Collaborated with the media team to create engaging visual content.

Media Committee Member | Nazaha Club

- Create visual and media content for awareness campaigns and university activities.
- Contribute to event coverage, teamwork, and organized communication materials

PROJECTS

INDIVERSE — Saudi Indie Game Discovery Platform

Flutter, Dart, REST APIs, Git/GitHub, UI/UX

- Built a Flutter platform that helps users discover and support Saudi indie games.
- Added personalized game recommendations based on player interests, including **For You** and **Upcoming Games**.
- Developed features for developers to manage their games, events, playtesting requests, and creator outreach.
- Used **Supabase** for authentication, database management, user preferences, events, and player requests.
- Designed the platform to bring players, indie game developers, and content creators together in one place.

Rihla 🌐

- Built a Flutter tourism app that helps users explore destinations and discover places to visit.
- Developed a simple browsing experience where users can view destinations, explore places, and access detailed information.
- Integrated API data using **REST APIs and JSON** to display dynamic content inside the application.
- Designed and developed the app with a focus on a clean UI, simple navigation, and an easy user experience.
- Achieved **1st Place for Best Project** during the first week of the Flutter Bootcamp.

Mazadat Auction Mobile App – Elm Bootcamp Project

Kotlin Multiplatform, SwiftUI, Android Studio, Xcode, API integration

- Developed a mobile auction application covering UI design, application logic, and API integration.
- Built auction list, auction details, login, and OTP flows based on Figma requirements.
- Selected among the Top 5 projects in the Bootcamp.

Taheel | AI-Powered Interview Preparation Platform

Next.js, Tailwind CSS, Prompt Engineering, AI API integration

- Developed an AI-powered interview preparation platform for students, graduates, and job seekers.
- Built personalized mock interview sessions based on the user's target role, company, experience level, and preferred language.
- Integrated an AI model to generate interview questions, evaluate answers, provide performance scores, personalized feedback, improved sample answers, and interview tips.
- Designed a clean and responsive user interface focused on usability and accessibility.
